

## SHOWER SEAT

### ADA Compliant Safety Shower Seat

ADA-22

C.D. Sparling Company's ADA-22 shower seat gives you the ability to enjoy the benefits of showering while providing a safe showering experience. Our shower seat can conveniently be folded up to the wall when not in use and extends only 3.25" from the wall. Our friction brake mounting brackets hold the seat in place on the wall without the use of springs that could corrode over time. The mounting brackets and frame are manufactured with quality American stainless steel. The seat is manufactured of linear low-density polyethylene, rigid foam filled, with a textured non-slip surface. This material has superior strength and durability and also includes UV stabilizers to prevent fading.

Made in the USA  
Assembled in Michigan

- 1 Seat - Linear low-density polyethylene, rigid foam filled seat with textured non-slip surface. Manufactured in Michigan
- 2 Frame - 3/4" Diameter 18 gauge, Type 304 polished and buffed stainless steel tubing. Manufactured in Michigan, Stainless Steel from North Carolina

## Anatomy of a Shower Seat
